## KOC MOBILE GETTING STARTED

---

To use KOC on mobile devices, you need to perform the following simple steps:

- A. Buy Ethereum from Exchange
- B. Install imtoken or TrustWallet for iOS or Android
- C. Ethereum for KOC trading
- D. Add tags to imtoken or TrustWallet

Details of each step are also summarized below.

### 1.1 Buy Ethereum from the exchange

First, you need to use the exchange to buy Ethereum:

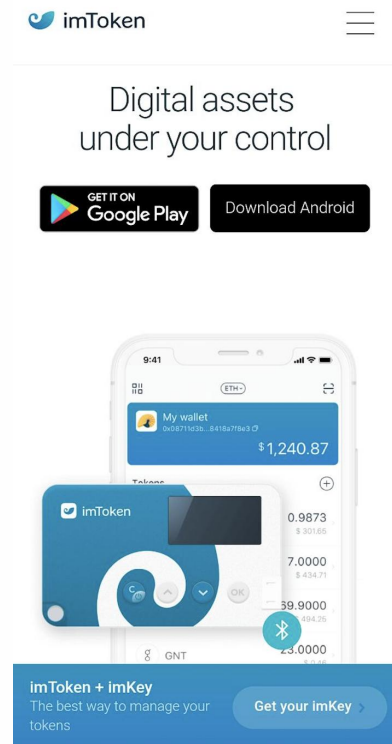

Go to Gemini or Coinbase and sign up for an account.

Set up a funding source, such as your bank account. (Don't worry that these are very common and safe) Buy Ethereum (ETH) and replace your

local legal currency (ie US dollars) with Ethereum. Buying ETH may take a while to make your first purchase, so now you may have to wait.

## 1.2 Install imToken or TrustWallet

Next, you will need to install imToken or TrustWallet, the popular Android mobile wallet. Please note that this is a separate hot item and is not directly related to KOC in any way. Understand that you have not provided any private information about you to KOC developers, all private information is only stored on your mobile phone.

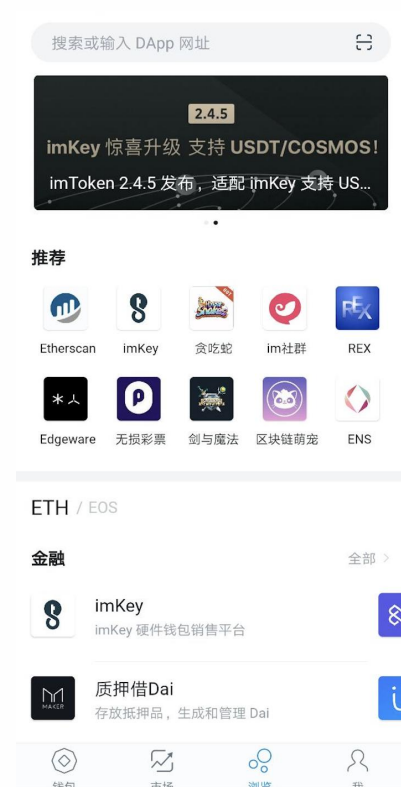

Install imtoken or TrustWallet on iOS or Android

Launch the imtoken or TrustWallet application and select "Create Wallet".

## 1.3 Enter KOC DAPP

After installing the imtoken or TrustWallet, turn to the "Browser" tab and visit the official website to exchange the Ethereum for them to

receive the KOC token by using this mobile simple interface. You can bookmark the site for easy access by clicking the vertical ": " next to the URL address.

You can purchase tokens by entering a certain number of Ethereum in the text box and clicking on "Buy". When you click Buy, a dialog box will appear. Make sure the gas price (GWEI) is set to 2 or higher and click "Submit". Be careful, because setting GWEI too low can cause long time transactions.

Once you receive the KOC tokens, they will be automatically stored in your wallet or you can transfer to any wallet that supports the Ethereum token. Check out the following to learn how this transaction works and why you want to have these tokens.

#### 1.4 Add tags to imtoken or TrustWallet

Now, in order to be able to view your KOC token in imtoken or TrustWallet, please follow these steps:

Open the Wallet tab

Single click the "+" button to add a token

Select the "KOC(KOC)" option in the list

Confirm contract address

Confirm the token symbol "KOC" and enter "18" as the decimal of the precision.

Click on "Add" and now you should be able to view KOC in your token list!

### 1.5 What is the next step?

After reading this guide, please visit the homepage for more information, including FAQs!

## K O C P C G E T T I N G S T A R T E D

---

To use KOC on your PC, you should perform the following simple steps:

- A. Buy Ethereum from Coinbase
- B. Download Chrome browser
- C. Download and set up MetaMask in Chrome to store Ethereum for exchange of KOC tokens.
- D. Add tags to Metamask
- E. Additional exchange features

Do you use a mobile phone? Please visit the "Getting Started with KOC on Mobile Devices" in the previous chapter.

### **Buy KOC tokens step by step:**

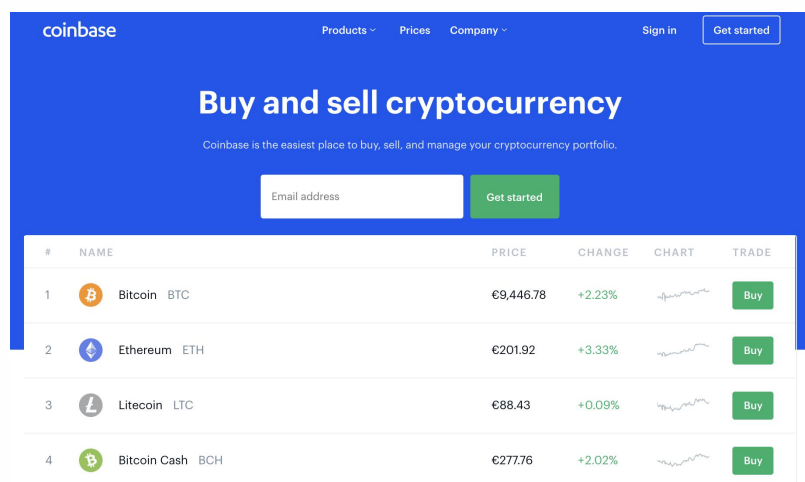

#### **2.1 Buy Ethereum**

First, you need to buy Ethereum on the exchange: Go to Coinbase and sign up for an account

<https://www.coinbase.com/>

Set the funding sources, such as your bank account to transfer your local legal currency (ie US dollars) to Coinbase and wait until your money goes to your Coinbase account. Buy Ethereum (ETH) and replace your local currency with Ethereum.

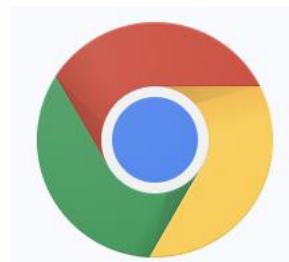

## 2.2 Download CHROME Browser

You need to install MetaMask to interact with the KOC website to purchase KOC tokens. First you need to download and install the Google Chrome browser:

Go to the Google Chrome website

<https://www.google.cn/intl/zh-CN/chrome/>

Download and install Google Chrome

## 2.3 Set METAMASK in CHROME

Once you have successfully purchased Ethereum on Coinbase, you will need to install MetaMask to interact with the Coinbase exchange. MetaMask allows you to use Ethernet web applications such as KOC.

Open a new tab in the Chrome browser, visit the MetaMask website and install MetaMask, <https://metamask.io/>

Create your MetaMask account and store your seed words safely.

Open the MetaMask extension

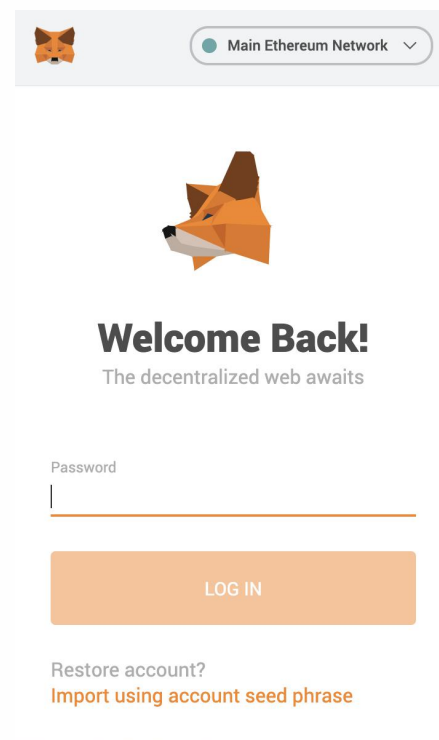

Click "..." and select "Copy Address to Clipboard"

Return to the Coinbase exchange and find the "send" or "transfer" function

Input the number of Ethereum you want to send to MetaMask

Paste in the address you have copied from MetaMask

Waiting for Ethereum

Log o to your MetaMask wallet balance

Ethereum for exchanging KOC tokens

Visit the official KOC game and obtain KOC tokens by exchanging Ethereum.

You can purchase tokens by entering a certain number of Ethereum in the text box and clicking on "Buy". When you click Buy, the MetaMask will show the following dialog box:

Stacks Image 205

Check the dialog and make sure the gas price (GWEI) is set to 2 or higher, then click Submit. Be careful, because setting the GWEI too low can cause long time transaction.

## 2.4 Add tags to METAMASK

In order to be able to view your KOC token in MetaMask, please follow these steps:

Open the MetaMask window in Chrome

Single click on the "TOKENS" tab

Click on "Add Token"

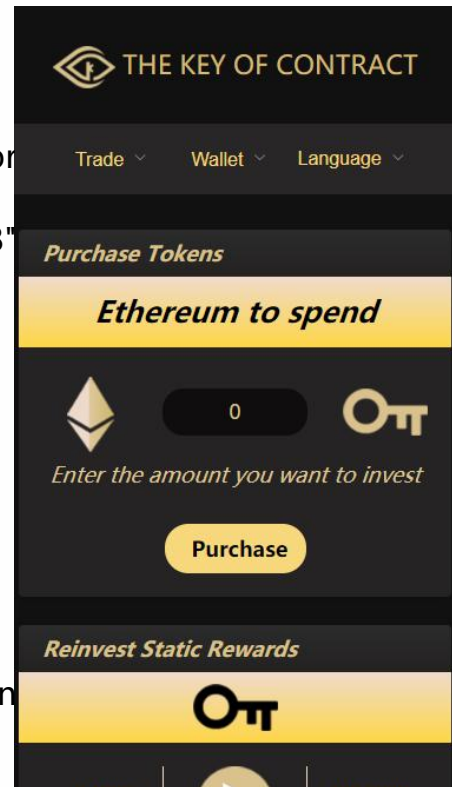

Enter token contract address

This should automatically load "KOC" for the token symbol and automatically load "18" for decimal precision

If not, please input it manually

Click "Add"

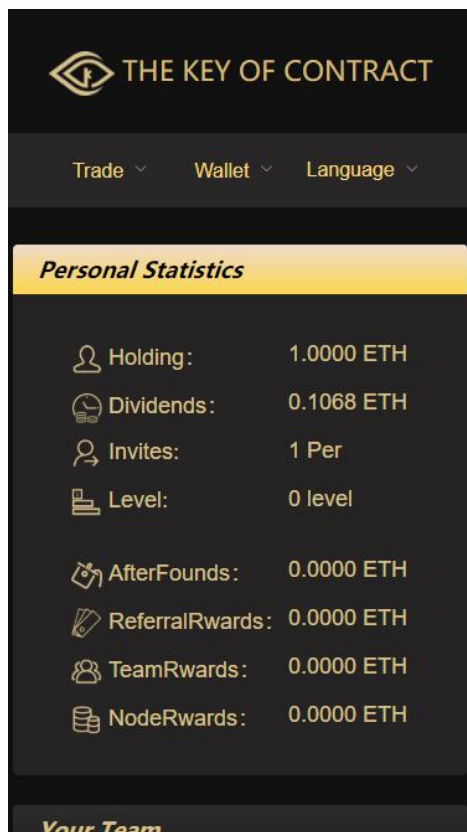

Now your token should appear in MetaMask

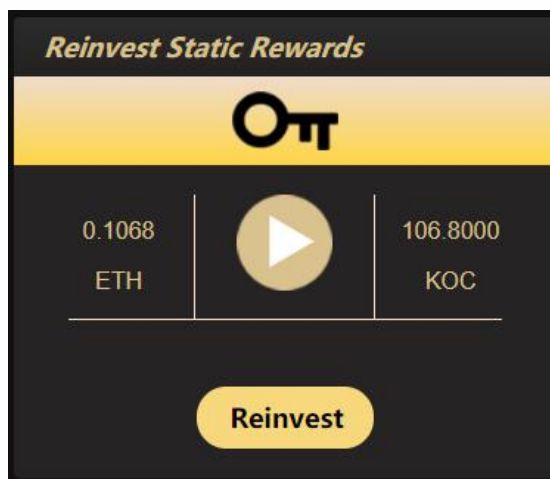

## 2.5 Additional exchange features

After you have purchased the original KOC token, you can take the following extra actions:

Check your account holdings (tokens and earnings)

Buy more tokens or reinvest in earnings

Withdraw incomes

## TEAM OASIS'S MASTERNODES

---

**Love the KOC project?**

**Love the five programmers from the OASIS team, buy them with their masternodes! Using someone's masternode purchase represents KOC's preference for their help.**

**Parzival's masternode**

**Art3mis' masternode**

**Aech's masternode**

**Daito's masternode**

**Shoto's masternode**

**In the future, I would be very grateful if you use my masternode to purchase tokens. You can get in touch with me at any time on Telegram.**
